

All inspections start at **9am** and will last a minimum of 5 hours.

Inspections CANNOT be performed while **repairs** are being made, while the RV is being **detailed** or during times when **walk-throughs** are scheduled.

Adequate space:

- To extend and retract ALL slideout rooms and awnings.
- To SAFELY move a ladder around the RV.

Refrigerator: RV type must be powered ON at least 12 hours prior to inspection time.

Propane: Tanks at least ½ full.

Fuel to test generator: Engine or generator fuel at least ½ full.

Hookups:

- Shore power supply - 50A or 30A (110v house power is NOT appropriate).
- City water connection - if unavailable, the freshwater tank **MUST** be **FULL**.
- Dewinterization **MUST** be performed prior to inspection time.
- Wastewater / Sewer hookups - preferred but not required.

Keys and Personal Contents:

- Personal contents should be removed from **ALL** areas, including:
 - Exterior storage bays AND interior cabinets and closets.
 - Linens on beds and furniture covers **MUST** be removed.
- KEYS to all areas **MUST** be available:
 - Entrance doors, cargo bays, fuel doors and ignition (if applicable)
- Wheel covers **MUST** be removed prior to inspection.

Inspection reports are typically delivered the **SAME** day, barring any travel or computer/technology issues.

****We prefer to consult with our clients the **SAME** evening of the inspection to discuss our findings and introduce the Project List feature included with our software so that repairs can be negotiated the following business day****
